

Create your own amazing filled balloon for yourself or as a gift. Use the Maker Station to stuff it with anything you want. Then inflate it, seal it and decorate it. Make Stuff-A-Loons for any occasion, celebration or just for fun.

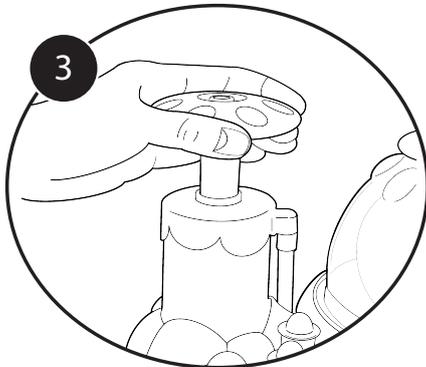

PLEASE REMOVE ALL PACKAGING BEFORE GIVING PRODUCT TO A CHILD. PLEASE RETAIN PACKAGING DETAILS FOR FUTURE REFERENCE.

Follow the instructions before using the Maker. We recommend help from an adult for younger children and for the first time using the Stuff-A-Loons maker. Practice first with an empty Stuff-A-Loons balloon. Create new styles by mixing with the accessories that come with the maker station or even better use your own crazy stuff! HAVE FUN!

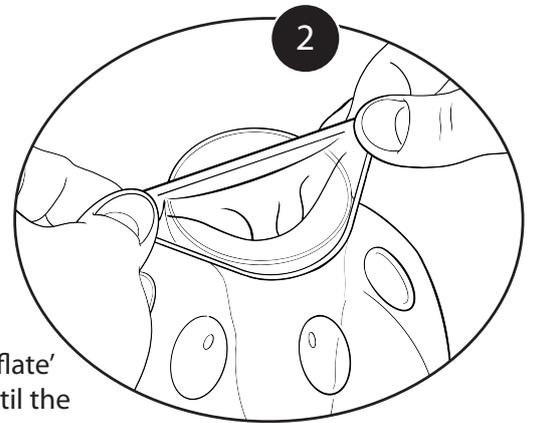

Stuff-A-Loons Maker Station is only to be used with Stuff-A-Loons balloons.

**1** Place the Clear dome onto the Maker Station and twist clockwise until it locks tightly closed.

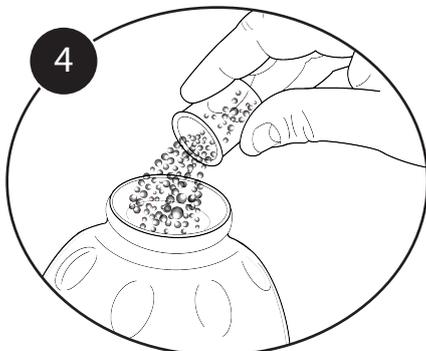

**2** Insert the balloon into the dome and carefully stretch the neck of balloon around neck of the clear dome.

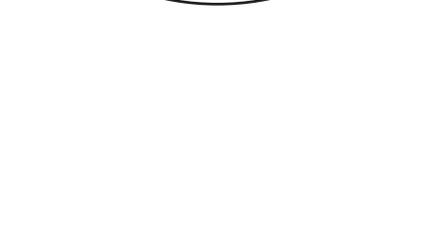

**3** Start pumping and the balloon will 'inflate' within the clear dome. Keep pumping until the balloon fills the chamber. If the balloon doesn't inflate, check the clear dome is closed tight and the seal is clean.

*Tip - if this is your first time try a practice balloon first with NO stuffing inside and go to step 5. Once you've mastered the process come back and try again adding your stuffings.*

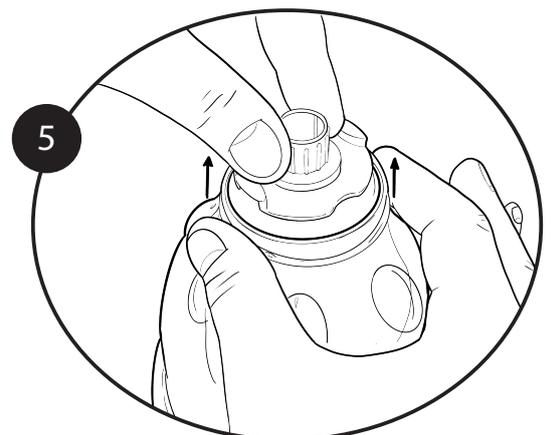

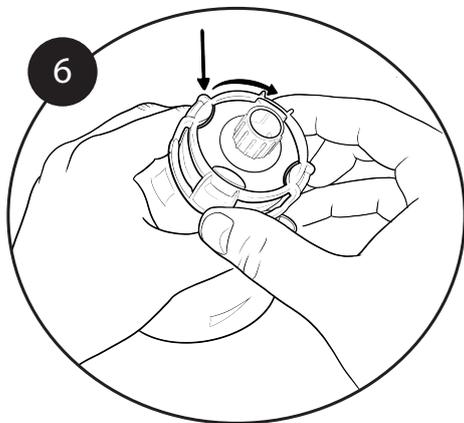

**4** Now the best part starts, it's deco time! Choose whatever you like to put in your balloon. Do NOT use sharp objects, the balloon may break. You can choose stuffings that come with maker or get creative and choose your own stuffings. Check out [www.stuffaloons.com](http://www.stuffaloons.com) for ideas.

To fix things like a small teddy, tie a thread or ribbon around it. Then Stuff it into the balloon and leave the thread or ribbon hanging out of the top. After the balloon is fully inflated pull the thread or ribbon and seal the balloon with the clip.

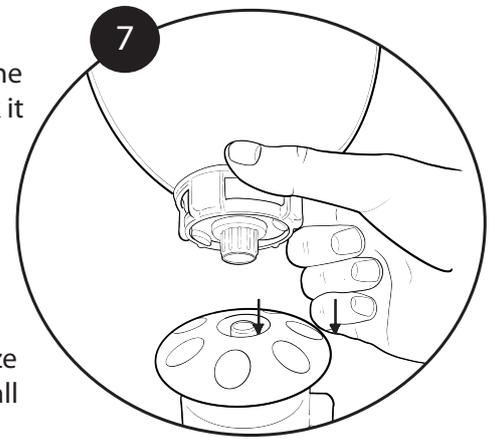

**5** Put the pink bung gently into the neck of the balloon in the vac chamber. Make sure it is the right way around and don't let it fall inside! Holding it level with the edge of the chamber, carefully lift and roll the neck of the balloon up and it will snap into the slot around the pink bung. It will seal tight and no air should escape. Now un-twist the clear dome and take the Stuffaloon out.

**6** Take the blue sealing ring and fit it to the pink bung. Align the tabs and push the ring onto the pink bung and twist to lock it in place.

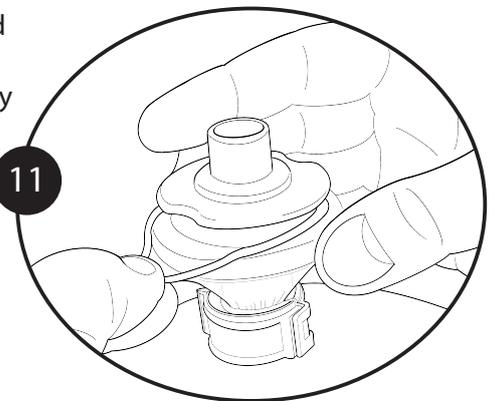

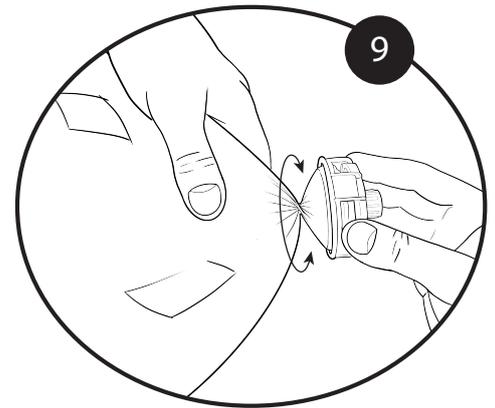

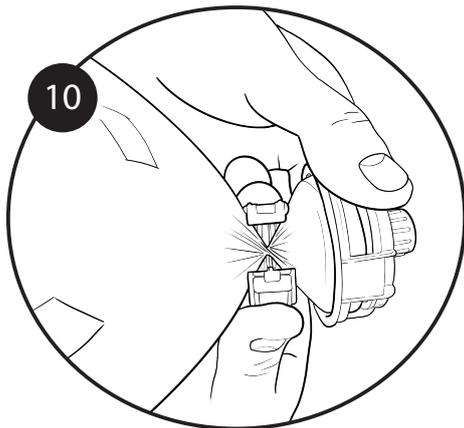

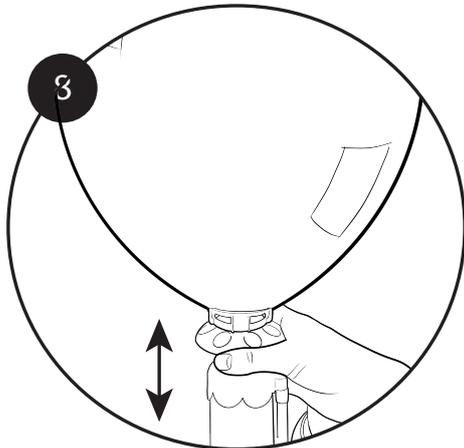

**7** Now place it firmly on top of the pump. This will ensure the inflation process will work properly.

**8** Start pumping the balloon into the size you want. Make sure you pull the pump all the way up and push all the way down. **WARNING – DO NOT over inflate the balloon!** Ask an adult to help and gently squeeze the balloon to check it is not going to burst, stop pumping before the balloon is too hard!

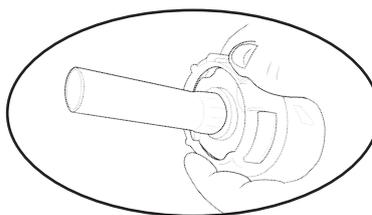

**9** Now you're ready to seal your balloon. Pull the bung gently away from the balloon to stretch the neck and give it a twist. **DO NOT PULL THE BUNG OUT!** Ask an adult for help if this is difficult.

**10** Put the special clip around the twisted neck of the balloon and snap it shut. Alternatively use a ribbon to tie tightly and seal the balloon.

**11** You're done, your balloon is closed. You can remove the blue sealing ring and carefully remove the bung and start decorating the outside perhaps with curly ribbons and a string to hang it. Again, choose the ones provided or use your own, whatever you want, it's up to you.

*Tip: Attach the adapter tube to the pink bung and connect to a hand or electric pump (not supplied) for faster inflating.*

*Tip: Use a damp cloth to gently wipe your inflated clear balloon. Then gently wipe it dry with a soft dry cloth. This will improve the transparency of your balloon.*

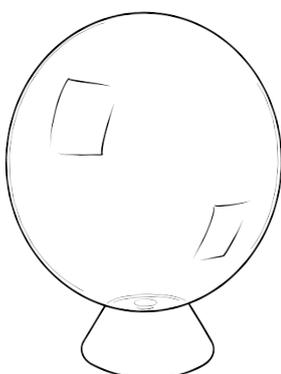

Visit [www.stuffaloons.com](http://www.stuffaloons.com) for detailed video demonstration instructions.

**⚠ WARNING!** Choking Hazard. Small parts. Not suitable for children under 3 years. Children under 8 years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once. Balloons are made of natural rubber latex. Do not use close to ears or head. Misuse may cause damage to hearing or eyes.

**WARNING: DO NOT BLOW THE BALLOON WITH THE MOUTH, WITH THE STUFF-A-LOONS PUMP ONLY! SMALL PARTS MAY BE INHALED!**

**WARNING: DO NOT BLOW THE MINI BALLOONS WITH THE MOUTH, WITH A BALLOON PUMP (NOT INCLUDED) ONLY!**

**PLACE IMPORTER LOGO AND ADDRESS HERE**

FOR THE RIBBON:  
WARNING! RISK OF  
ENTANGLEMENT/  
STRANGULATION DUE TO  
LONG CORD. KEEP AWAY  
FROM HEAD AND NECK.

Made in China  
COMPLIES WITH THE SAFETY REQUIREMENTS OF  
ASTM F963 AND EN71.
